

Website Visibility Check

takafulsolutions.com audit depth

54

/100

OVERALL HEALTH

The groundwork is real, but the site is leaving most of its visibility unclaimed.

WHERE YOU STAND

1	Google Visibility		47
	NEEDS IMPROVEMENT Well targeted, but one page can only compete for one kind of search.		
2	Website Content		45
	NEEDS IMPROVEMENT Your weakest area. Three products are named; none is explained.		
3	User Experience		81
	GOOD Every enquiry button opens WhatsApp with the right question already written.		
4	Technical Foundation		56
	FAIR Properly set up, but slow to respond and living at two addresses at once.		
5	Local Search		58
	FAIR Petaling Jaya is named and correctly marked up for Google.		
6	Design & Brand		81
	GOOD Your strongest area, and the best design result we have recorded.		

DESIGN & BRAND REVIEW

Assessed against 24 standard criteria across five areas. 19.5 were met.

Imagery & Assets		4/5	A sharp, professional photograph of a real consultant - but it is the only image on the site.
Typography		4/4	A full pass. One well-chosen typeface, clear hierarchy, nothing shouting.
Colour & Brand		4.5/5	A disciplined navy and teal that anyone would remember; five button styles is a few too many.
Hero Section		4/5	Static, calm and readable, with a person in it. Two buttons where one would land harder.
Layout & Consistency		3/5	Sound buyer order, but recruitment sits in front of the sell and there is no proof section at all.

Products you advise on medical card, hibah, critical illness		3
Pages explaining them that someone researching can find		0

Nobody buys takaful on impulse. They search what hibah means, what a medical card covers, and what happens if they claim - and none of those searches can currently find you.

WHAT IS WORKING

- ✓ Every enquiry button opens WhatsApp with a contextual pre-filled message - better than any other site reviewed
- ✓ One typeface (Inter) used consistently with clear hierarchy; nothing shouting
- ✓ A disciplined navy-and-teal identity anyone would remember
- ✓ Petaling Jaya named, with FinancialService and PostalAddress markup correctly in place

OUR PRIORITY RECOMMENDATIONS

- 01 Three products named, none explained**
Nobody buys takaful on impulse. The questions people research before choosing an adviser currently have no page to land on.
- 02 One page competes for every search**
A single page can only compete for one kind of search, however good it is.
- 03 No proof anywhere - no testimonials, licence, or track record**
There is nowhere a visitor can see that anyone has trusted you before. For a decision this personal, that is the missing piece.
- 04 Site answers at two addresses with no redirect**
Your site exists at two addresses at once, so Google has to guess which is real - and the value splits between them.
- 05 Caching disabled; slow first response**
Pages take noticeably longer to start loading than they should, and nothing is stored for repeat visitors.
- 06 No social share preview card**
When your link is shared on WhatsApp, no preview card appears - every share is less persuasive than it should be.
